

**GF02: 10:10–10:20 a.m. Research Themes in
Physics-Teacher Preparation***

*David E. Meltzer, Arizona State University, Polytechnic Campus, Mesa,
AZ 85212; david.meltzer@asu.edu*

A diverse array of themes has characterized research on the preparation of physics teachers during the past 50 years, both in the United States and worldwide. I will review some of these themes and discuss examples of the work that has been reported, including teachers' views of students' ideas, design and evaluation of courses on physics pedagogy, supervised field experiences involving practice teaching, and outcomes evaluations of teacher-preparation workshops and programs.

*Supported in part by APS and AAPT through PhysTEC: NSF PHY-0108787.
